Based on the case study given above answer the following:

- (i) The characteristic features displayed by Mohan indicate that he is in:
- (a) Early childhood stage
 - (b) Late childhood stage
 - (c) Adolescent stage
 - (d) Adulthood stage
- (xiv) Neuromuscular co-ordination is related to:
- (a) Nervous system and cooling down system
 - (b) Nervous system and Muscular system
 - (c) Nervous system and mass system
 - (d) Nervous system and mind system

- (xv) Match the following:
- | | |
|--|------------------|
| (I) Physical fitness | (1) Leslie |
| (II) Worthy use of leisure time | (2) H.Clerke |
| (III) Neuro muscular aspect of development | (3) Hetherington |
| (IV) Remote objectives | (4) Bookwalter |
- (a) I-3, II-1, III-3, IV-4
 (b) I-4, II-3, III-2, IV-1
 (c) I-2, II-4, III-1, IV-3
 (d) I-1, II-3, III-4, IV-2
- (xvi) Which of the following exercises helps the body to gradually make transition to a resting or near resting heart rate?
- | | |
|-------------|------------------|
| (a) Jogging | (b) Cooling-down |
| (c) Warm-up | (d) Sprinting |
- (xvii) Ectomorph body usually refers to:
- (a) Round physique
 (b) Balanced body
 (c) Lean body
 (d) Muscular body
- (xviii) A 100% perfection in hitting the target, refers to the skill component_____.
- | | |
|--------------|--------------|
| (a) Speed | (b) Accuracy |
| (c) Strength | (d) Power |
- (xix) The training by an athlete should be followed without any break. Which principle does it refer to?
- (a) Principle of continuity
 (b) Principle of adaption
 (c) Principle of over load
 (d) Principle of progression
- (xx) The full form of MCL:
- (a) Medial cruciate ligament
 (b) Medial collateral ligament
 (c) Medial common ligament
 (d) Medialcrossover ligament

Question 2

- (i) State any two differences between growth and development. [2]**
- (ii) What is first aid? [2]**
- (iii) State any three responsibilities of a coach in physical education. [3]**
- (iv) Mention any three causes of sports injuries. [3]**

Question 3
