

DELHI PUBLIC SCHOOL NEWTOWN
SESSION 2024-2025
MONDAY TEST

CLASS: X
SUBJECT: GEOGRAPHY

FULL MARKS: 40
DATE: 15/07/24

INSTRUCTIONS:

- This paper consists of three printed pages.
- Answers should be to the point.
- Copy the question numbers carefully before answering the questions.

Attempt all questions

Question 1

(i) Study the map given below and answer the questions that follow:

[2]

- (a) What is the four-figure grid reference of Δ 217?
(b) Find out the compass direction of Arniwada from Rampura.
- (ii) Define the following terms
- (a) Causeway
(b) Broken ground
- (iii) How is Triangulated Height different from Spot Height?

[2]

[1]

Question 2

On an outline map of India provided:

[10x1=10]

- (a) Shade and label Andaman sea
- (b) Mark and name the strait separating India from Sri Lanka
- (c) Mark and label river Jhelum
- (d) Shade and label an area of alluvial soil to the south of Tropic of Cancer
- (e) Mark and label river Betwa
- (f) Mark and name the lagoon located on the east coast of India
- (g) Shade and label an area of black soil in the western part of India
- (h) Mark and name a tributary of an important peninsular river.
- (i) Mark and label river Brahmaputra
- (j) Shade and label gulf of Khambhat

Question 3

Choose the correct answers to the questions from the given options.

(Do not copy the questions, write the correct answers only.)

[5x1=5]

- (i) Which type of soil is very fertile and suitable for both rabi and kharif crops?
 - (a) Black soil
 - (b) Laterite soil
 - (c) Alluvial soil
 - (d) Red soil
- (ii) Chir pine: Mountain forest
 - (a) Semal: Packing cases.
 - (b) Palash: Tropical Deciduous forest
 - (c) Breathing roots: Mangrove forest
 - (d) Mixed stands: Tropical Evergreen forest
- (iii) Which type of forest is dominantly found in the North-eastern hill states of Manipur?
 - (a) Tropical Deciduous forest
 - (b) Tropical Thorn forest
 - (c) Littoral forest
 - (d) Tropical Evergreen forest
- (iv) Which soil conservation method involves planting crops in horizontal rows along the same height instead of up and down the hill slope?
 - (a) Terraced farming
 - (c) Shelterbelts
 - (d) Contour ploughing
 - (e) Plugging of gullies
- (v) Assertion (A): Irrigation is essential for crops to grow in red soil.
Reason (R): Red soil is sticky and it can retain moisture.
 - (a) Both A and R are true and R is the correct explanation of A.
 - (b) Both A and R are true and R is not the correct explanation of A.
 - (c) A is true but R is false

(d) A is false but R is true

Question 4

- (i) All civil engineering structures require foundation to rest on sufficient strong soil or rock strata. This soil is a very important building material and is found in the regions that receive heavy rainfall and high temperature. This soil has been encountered in abundance in most parts of Goa.
- (a) Identify the soil and state its texture. [2]
(b) Mention two ways to make this soil more productive.
- (ii) With reference to soil conservation in India answer the following questions. [2]
(a) State two methods of soil conservation in the desert and semi desert regions in India.
(b) Why do we need to conserve soil?
- (iii) With reference to black soil, answer the following: [3]
(a) How is it formed?
(b) What is the advantage of clay content in this soil?
(c) Name any two crops grown in this soil.
- (iv) Give geographical reasons for the following: [3]
(a) Badland topography is a feature of gully erosion.
(b) Red soil is not a fertile soil.
(c) Alluvial soil is also known as riverine soil.

Question 5

- (i) Ramesh from Gujarat recently visited Meghalaya with his parents and was surprised to see the difference in the type of natural vegetation in the visiting place from his hometown. [2]
(a) What differences did he find between the types of vegetation in his own state and Meghalaya?
(b) How does the vegetation of the visiting place correlate with the environment?
- (ii) (a) Why littoral forests grow breathing roots? [2]
(b) Name two trees found in the monsoon forests.
- (iii) Give geographical reasons for the following: [3]
(a) Forests prevent floods.
(b) Tropical deciduous forests are commercially most exploited.
(c) Acacia has long roots.
- (iv) (a) Name the natural vegetation found in the eastern part of western ghat. [3]
(b) Why does the vegetation in the Himalayas vary with altitude? Name a state in India where mountain forests are found.
