

DELHI PUBLIC SCHOOL NEWTOWN
SESSION 2024-25
PRE BOARD EXAMINATION

CLASS: X
SUBJECT: ENVIRONMENTAL SCIENCE [SET A]

FULL MARKS: 80
TIME: 2 HOURS

*Answers to this Paper must be written on the paper provided separately.
You will not be allowed to write during the first 15 minutes.
This time is to be spent in reading the Question Paper.
The time given at the head of this Paper is the time allowed for writing the answers.*

*Attempt all questions from Section A and any four questions from Section B
The intended marks for questions or parts of questions are given in brackets [].
This question paper consists of 5 printed pages.*

SECTION A (40 Marks)

Attempt all questions from this Section

Question 1

Choose the correct answers to the questions from the given options.
(Do not copy the questions, write the correct answers only)

[16]

- (i) Soil erosion: heavy rains:: Soil conservation: _____
(a) More fertilizers
(b) More chemical pesticides
(c) Construction activities
(d) Planting more trees
- (ii) Pollution from domestic combustion can be controlled by
(a) Use of fire wood
(b) Use of alternative fuels
(c) Use of charcoal stoves
(d) Use of cow dung cakes
- (iii) A secondary city is also known as
(a) Eco city
(b) Satellite city
(c) Metropolitan city
(d) Modern city
- (v) The device which reduces air pollution from vehicle is
(a) Spark plug
(b) Catalytic converter
(c) Scrubber
(d) Plate tower
- (vi) “New landslide hot spots found in Himalayas and Western Ghats” warns survey.
(Source: Environmental News- Hindustan times- August 2024)
In your opinion what would be the cause for the above warning?
(a) Afforestation
(b) Excessive deforestation
(c) Regenerative forestation
(d) Community forestry

- (vii) Rearrange the following steps in the ascending order that depicts eutrophication.
 Step 1: Nutrient enrichment in water bodies occurring due to runoff from agricultural fields.
 Step 2: Dissolved oxygen depletion in water bodies
 Step 3: Rapid growth of algae resulting in algal bloom
 Step 4: Aquatic species die as a result of the loss of oxygen
 (a) Step 1, Step 2, Step 3, Step 4
 (b) Step 2, Step 3, Step 4, Step 1
 (c) Step 1, Step 3, Step 2, Step 4
 (d) Step 3, Step 1, Step 2, Step 4
- (viii) Which form of electricity generation causes the most environmental damage?
 (a) Nuclear energy
 (b) Solar energy
 (c) Thermal energy from coal
 (d) Geothermal energy
- (ix) The reason for poor standard of living and malnutrition in India is
 (a) Overpopulation
 (b) Environmental conditions
 (c) Absence of natural resources
 (d) Poor economy of rural India
- (x) Remote sensing satellites include
 (a) Photography by a camera
 (b) Photography from aircraft
 (c) Observation by naked eye
 (d) Sensing by sensors from space satellites
- (xi) Pick the incorrect pair from the following:
 (a) Green revolution 1. HYV crops
 (b) Ramsar Convention 2. International trade
 (c) Windmill 3. Wind farm
 (d) Mosquito repellent 4. Air pollution
- (xii) Assertion: We lose productive time due to traffic jams on roads
 Reason: Increasing the number of public transportation in cities can reduce traffic congestion.
 (a) A is true and R is the correct reason for A.
 (b) A is true but R is not the correct reason for A.
 (c) A is true but R is false.
 (d) A is false but R is true.
- (xiii) Which symbol is depicted by the triangle in the picture given below?

- (a) Country
- (b) Stamp
- (c) Family planning
- (d) Family and children

(xiv) Match the following columns correctly:

Column A

- (A) Montreal Protocol
- (B) GEF
- (C) CITES
- (D) Earth Summit
- (a) A-i, B-iii, C-ii, D-iv
- (b) A-ii, B-iv, C-i, D-iii
- (c) A-iv, B-iii, C-ii, D-i
- (d) A-iii, B- i, C-ii, D-iv

Column B

- (i) Funds for climate change
- (ii) Protection of animals
- (iii) Reduction of ODS
- (iv) Agenda 21

(xv) Identify the farming technique shown in the diagram given below.

- (a) Shelter belts
- (b) Contour farming
- (c) Dry farming
- (d) Terrace farming

(xvi) In situ conservation does NOT allow:

- (a) Captive breeding
- (b) Better conservation on a long term period
- (c) Protection of indigenous species in natural habitat
- (d) Natural selection and community evolution

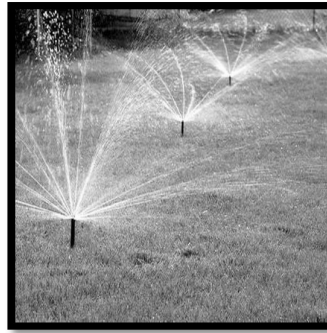

Question 2

- (i) State any two ways of supporting the developing countries to follow Montreal Protocol. [2]
- (ii) How are humans responsible for degrading wetlands? [2]
- (iii) Name a pest control method that uses predator insects. Give an advantage of it. [2]
- (iv) What are the key aspects of forest harvesting of NTFPs? [2]

Question 3

- (i) Mention the significance of core and buffer zone of the Nilgiri Biosphere Reserve. [2]

(ii)

[2]

What type of irrigation system is shown in the picture? Write one advantage of the system.

(iii) What is the purpose of land use planning in urban area?

[2]

(iv) Mention two constraints faced by the farmers in the implementation of integrated plant nutrient programmes.

[2]

Question 4

(i) “One of every six people in developing countries is not getting enough food to eat”. State any two reasons for the statement above.

[2]

(ii) How can overgrazing be controlled?

[2]

(iii) Discuss the reasons to prove landfills are not ecofriendly.

[2]

(iv) Why is kerosene as a fuel more popular in rural India than urban India?

[2]

SECTION B (40 MARKS)

(Attempt any four questions from this section)

Question 5

(i) Secondary cities can play a major role to reduce pressure on metropolitan cities. Suggest five measures which can be developed in the secondary cities to stop migration of people into metro cities.

[5]

(ii) What are green buildings? Write any four features of it.

[5]

Question 6

(i) Man must realize that in order to survive, he must handle nature with care. Based on the statement given above, analyze any five ways in which humans are responsible for the loss of biodiversity.

[5]

(ii) Illustrate the role of NGOs towards sustainable development.

[5]

Question 7

(i) List five key factors that are important for the town planners to keep in mind while developing a sustainable environment.

[5]

(ii) What are GMOs? Is GMO a boon or a curse?

[5]

Question 8

(i) Analyse the dangers of people living in the slums.

[5]

(ii) A school in a locality of Kolkata made it mandatory to walk or cycle down for the students who stayed in the vicinity and to use only the school bus for students who lived at a distance. This policy was appreciated by the environmentalists.

[5]

Analyze possible scenarios and reasons why the policy was well appreciated by the environmentalists.

Question 9

- (i) **SECI (Solar Energy Conservation of India Ltd) unveils India's largest battery project pioneering renewable energy innovation in Chhattisgarh.** [5]

(Source: PIB, New Delhi, February '24)

Based on the news above, mention any three reasons for promoting solar power in India.

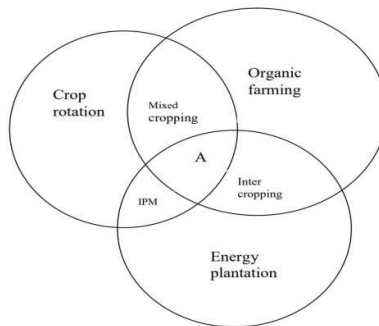

Also state two limitations of solar power that might be challenging for the project.

- (ii) **Mention the reasons for overpopulation in India.** [5]

Question 10

- (i) **Discuss the application of remote sensing satellites in the collection of environmental data.** [5]

- (ii) [5]

What type of agriculture is depicted by A? Write its characteristic features.
