

DELHI PUBLIC SCHOOL NEWTOWN
SESSION 2024-25
MONDAY TEST

CLASS: X
SUBJECT: BIOLOGY

FULL MARKS: 40
DATE: 08/11/24

General Instructions:

- The paper consists of three printed pages.
- Answers should be to the point.
- Copy the question number carefully before answering the questions.
- Marks will be deducted for spelling errors.

1. Choose the correct answer: [5]

(i) Assertion (A) – Cro-Magnon was perfectly orthognathous.

Reason (R) – Cro-Magnon had straight and strong jaw with man like dentition.

- (a) A is true and R is false (b) A is true and R is true
(c) Both A and R are false (d) A is false and R is true

(ii) Hormone testosterone is produced in:

- (a) Seminal vesicle (b) Seminiferous tubule
(c) Leydig cells (d) Bulbo urethral gland

(iii) Sheena was going through the diagram of ear. She observed that there is a membranous structure at the end of the auditory canal. Identify the membranous structure.

- (a) Oval window (b) Round window
(c) Tympanum (d) Utriculus

(iv) Assertion (A) – Blastocyst travels to the uterus through vagina.

Reason (R) – Oviduct is the site of fertilization.

- (a) Both A and R are false (b) A is true and R is false
(c) Both A and R are true (d) A is false and R is true

(v) Rita and her friends were studying about hormones and they understood that a hormone acts on the uterus and causes the lining to become thicker and develop more blood vessels. Rita and her friends gave their own answers. Identify whose answer was correct.

1. Rita- FSH 2. Shyam- Oestrogen 3. Rahul- LH 4. Ryan- Testosterone

- (a) Rahul is correct (b) Rita is correct
(c) Ryan is correct (d) Shyam is correct

2. Name the following: [5]

(a) Ancestral human with a cranial capacity of 800cm^3 - 1125cm^3 .

- (b) Scientist who proposed Inheritance of Acquired Characters.
- (c) A condition in which the cornea turns opaque.
- (d) Cells which are sensitive to light and help in vision.
- (e) A worm like tube projecting from the blind end of the caecum.

3. Fill in the blanks:

[5]

Charles Darwin published his book ____ (a) ____ in 1859. He had proposed the Theory of ____ (b) _____. Classic example of this theory is provided by Peppered moth whose scientific name is ____ (c) _____. Scientific name of human being was given by ____ (d) _____. Man belongs to the order ____ (e) _____.

4. Given below is the cross section of female reproductive system. Match the structures marked (a) to (e) with their correct functions:

[5]

Female Reproductive System	Functions
	1. Sperms are released here. 2. Ovum is released from this structure. 3. Foetus grows here. 4. Catches hold of the ovum when released and takes to tube marked as '(a)'. 5. Fertilisation takes place here. 6. Produce FSH hormone.

5. Answer the following questions:

- (i) Define Gestation. [1]
- (ii) Differentiate between Fertilisation and Implantation on the basis of definition. [2]
- (iii) In the below given diagram you can see that, Rishita was reading her book in the garden and while reading she kept the book at a far distance which made her read the book properly as keeping the book nearer to her eyes made the writings blurred. Give two reasons for the cause of this eye defect. [2]

- (iv) Rina's biology teacher told her that 'Yellow spot on retina is the region of

brightest vision'. Explain with reasons to help Rina understand the statement told by her teacher. [2]

(v) Draw a neat and well labelled diagram of a sperm. [3]

6. Answer the following questions:

(i) Define Speciation. [1]

(ii) Sohini went to the Indian museum with her friends and there she saw some paintings of a human ancestor who was the successor of *Homo erectus* and lived mostly in Western Europe, North Africa and Asia. Mention the cranial capacity and height of this Human ancestor whose paintings they had observed. [2]

(iii) Identify the below given diagram of the human ancestor of modern man. Mention about the forehead of Modern man. [2]

(iv) Explain the principle of “Use and Disuse”. [2]

(v) Below given is the diagram of a human ear. Observe the diagram and mention the functions of the parts labelled as (a), (b) and (c). [3]
