

DELHI PUBLIC SCHOOL NEWTOWN
SESSION 2025-26
PRE BOARD EXAMINATION

CLASS: X
SUBJECT: ENVIRONMENTAL SCIENCE [SET A]

FULL MARKS: 80
TIME: 2 HOURS

*Answers to this Paper must be written on the paper provided separately.
You will not be allowed to write during the first 15 minutes.
This time is to be spent in reading the Question Paper.
The time given at the head of this Paper is the time allowed for writing the answers.*

*Attempt all questions from Section A and any four questions from Section B
The intended marks for questions or parts of questions are given in brackets [].
This question paper consists of six printed pages.*

SECTION A (40 Marks)
Attempt all questions from this Section

Question 1

Choose the correct answers to the questions from the given options.
(Do not copy the questions, write the correct answers only)

[16]

- (i) Biodegradable wastes: composting:: Biomedical wastes:_____
- (a) Incineration
 - (b) Sanitary land filling
 - (c) Open dumping
 - (d) Recycling
- (ii) Biofertilisers are composed of
- (a) Crop residue after harvesting
 - (b) Animal dung
 - (c) Living micro organisms like bacteria and fungi
 - (d) Earthworm casting
- (iii) The alternate energy that can be used directly from the source is
- (a) Solar energy
 - (b) Wind energy
 - (c) Geothermal energy
 - (d) Biomass energy
- (iv) In situ conservation does NOT allow:
- (a) Protection of indigenous species in natural habitat
 - (b) Captive breeding
 - (c) Natural selection and community evolution
 - (d) Better conservation on a long term period

- (v) The device which reduces air pollution from vehicle is
- (a) Spark plug
 - (b) Catalytic converter
 - (c) Scrubber
 - (d) Plate tower
- (vi) Dengue cases in India have reached nearly 95000 between January and July 31, 2023, with numbers spiking after excessive rains caused water logging.
(Source: *The Economic Times*, Sept, 2023)
Water logging occurs because of:
- (a) Proper public sanitation
 - (b) Over irrigation of fields
 - (c) Adequate drainage
 - (d) Soil impermeability
- (vii) Rearrange the following steps in the ascending order that depicts debt trap.
Step 1: The country or individual takes another loan to repay the previous one.
Step 2: The burden of interest and repayment continues to increase.
Step 3: A loan is taken to meet developmental or financial needs.
Step 4: The borrower is unable to generate enough income to repay the loan.
- (a) Step 1, Step 2, Step 3, Step 4
 - (b) Step 2, Step 3, Step 4, Step 1
 - (c) Step 1, Step 3, Step 2, Step 4
 - (d) Step 3, Step 4, Step 1, Step 2
- (viii) The statistical study of human population with reference to size, density and other statistics is known as:
- (a) Population ratio
 - (b) Demography
 - (c) Census
 - (d) Anthropology
- (ix) The objective of community forestry is:
- (a) Planting trees on the slopes of mountains
 - (b) Forming self help groups
 - (c) Planting of trees by villagers on common lands and share the products
 - (d) Replacing use of wood with other products
- (x) Seeds of new plant varieties obtained by breeding of closely related plants are
- (a) Dicotyledenous seeds
 - (b) Hybrid seeds
 - (c) Open pollinated seeds
 - (d) Monocotyledenous seeds
- (xi) The vehicle shown in the picture runs on
- (a) CNG
 - (b) LPG
 - (c) Diesel
 - (d) Petrol

- (xii) **Assertion:** Pollution control is necessary to maintain the natural resource of the country.

Reason: The rising population exhausts the resources at a fast rate.

- (a) A is true and R is the correct reason for A.
- (b) A is true but R is not the correct reason for A.
- (c) A is true but R is false.
- (d) A is false but R is true.

- (xiii) Pick the incorrect pair from the following:

- | | |
|----------------------|-------------------------------|
| (a) Green manure | 1. cowpeas |
| (b) Biofertiliser | 2. mycorrhizae |
| (c) Energy planation | 3. Low calorific value plants |
| (d) GMO | 4. Modified organisms |

- (xiv) Match the following columns correctly:

Column A

- (A) IUCN
- (B) Ramsar
- (C) Extinct species
- (D) Kyoto

Column B

- (i) Totally wiped
- (ii) Wetland conservation
- (iii) Reduction of ODS
- (iv) Red list

- (a) A-i, B-iii, C-ii, D-iv
- (b) A-ii, B-iv, C-i, D-iii
- (c) A-iv, B-ii, C-i, D-iii
- (d) A-iii, B- i, C-ii, D-iv

- (xv) The picture given below refers to

- (a) A zone with maximum urban development
- (b) Unplanned growth of urban areas

- (c) Areas in cities where houses are provided by the government
- (d) Preservation of green spaces within the city

- (xvi) The burning of solid waste is not recommended because
- (a) It is very costly
 - (b) It requires a lot of space
 - (c) It requires modern technologies
 - (d) It causes several environmental issues

Question 2

- (i) Chinese manufactures discovered a market for their plastic toys in India, where the price point for toys is higher. With their creative designs and lower pricing, these plastic toys made in China have now become more popular in Indian markets. [2]
Regarding the information given above, is it an example of unfair trade? Why?
- (ii) List any two methods in which human lifestyle directly degrades wetlands. [2]
- (iii) Mention two advantages of growing trees along roadside. [2]
- (iv) State two reasons for melting the Gangotri glacier. [2]

Question 3

- (i) Expand PETA. State one function of PETA. [2]
- (ii) [2]

Identify the type of bulb shown in the picture. Why this type of bulb is increasingly used in India?

- (iii) Imagine you are a wildlife conservationist tasked with protecting endangered species. Analyze the specific challenges faced by critically endangered species compared to vulnerable species. [2]
- (iv) Overconsumption is an important reason for loss of biodiversity. Give two reasons in support of the above statement [2]

Question 4

- (i) What is nuclear fission? Give one advantage of fission over fusion. [2]
- (ii) What is smog? State one ill effect of smog. [2]
- (iii) Discuss the reasons to prove landfills are not ecofriendly. [2]
- (iv) Why wind energy cannot be widely used in India? [2]

SECTION B (40 MARKS)
(Attempt any four questions from this section)

Question 5

- (i) What is conservation tillage? Explain any three advantages of conservation tillage. [5]
- (ii) The Sunrise Public School in Pune decided to construct a new classroom block following green building principles. What characteristics should the building feature? [5]

Question 6

- (i) What do you understand by Global Interdependence? Suggest three ways by which international co operation can help in achieving a sustainable future. [5]
- (ii) What is GEF? Mention the area of work on which GEF focuses on. [5]

Question 7

- (i) Uncontrolled economic growth comes at the cost of environmental health. Discuss. [5]
- (ii) What are the advantages of allowing a Multinational Company to set up its operation in the host country? Write three disadvantages of the same. [5]

Question 8

- (i) Hydropower can protect communities and their livelihood by supplying water that is managed efficiently and safely. [5]
Give five ways in which hydropower is advantageous to people and also safeguards the environment.
- (ii) A school in a locality of Kolkata made it mandatory to walk or cycle down for the students who stayed in the vicinity and to use only the school bus for students who lived at a distance. This policy was appreciated by the environmentalists. Analyze possible scenarios and reasons why the policy was well appreciated by the environmentalists. [5]

Question 9

- (i) Singapore court gets tough on rhinoceros smuggler. It was Singapore's largest seizure of rhino horns smuggled via air that transited in the Island nation en route from Johannesburg, South Africa, to LAO PDR in 2022. [5]
(Source: *Traffic.org*, 2nd February 2024)
 - (a) Name the convention that banned the trade on rhino horns.
 - (b) Mention the main objective of this convention.
 - (c) Give any three ways on how wildlife harvesting can be done for commercial purpose sustainably.
- (ii) List five key factors that are to be kept in mind by town planners while developing sustainable urban environment. [5]

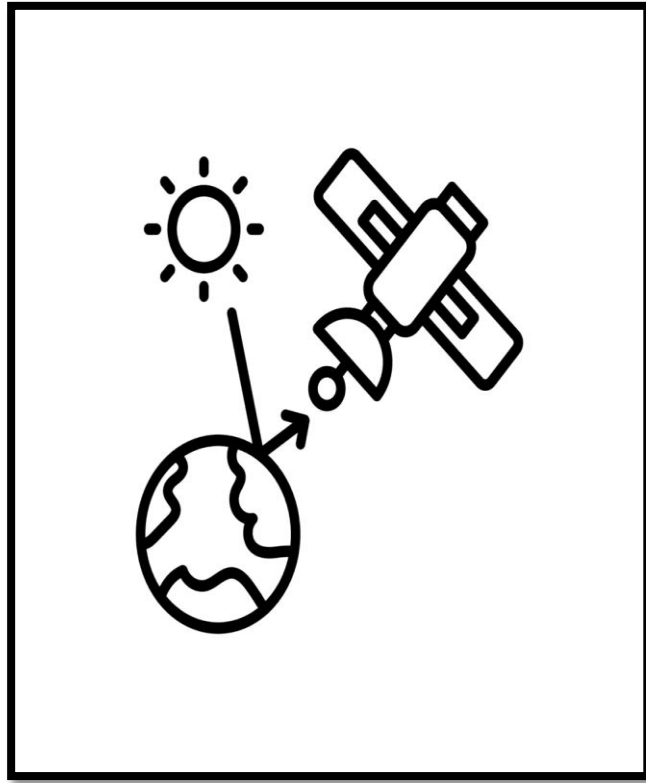

Question 10

(i) Discuss the ways by which population can be kept under control.

[5]

(ii)

[5]

Identify the technology shown in the picture. Describe how it plays a significant role in collection of environmental data.
